Since 2014  
**44**

## A Little About Us

Draft Gratitude saves draft horses from slaughter by providing a second chance and a place to call home. Our main focus is aged farming horses in need of a safe retirement. These horses have spent hours, and days, and years in harnesses working. They have earned the right to have a safe ending.

While we can't save them all, we focus on doing the best job we can with ones that we can save. Our position on rescue will always be based on quality care over quantity of saves. We are an all-volunteer, nonprofit organization.
